-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

The restriction requirement has been withdrawn since all the claims read on the elected embodiment.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 4542598 (Misevich et al) in view of US 5964047 (Covatch).

Misevich teaches an article of footwear comprising middle or second layer having a front portion that is relatively rigid (board 25), a mid-portion (flexible coupling 15) located under the arch of the foot, and a rear portion that is relatively rigid (44) substantially as claimed except for the upper having an outer layer of waterproof and breathable material and an inner layer of moisture wicking insulating material and a waterproof seal. Covatch teaches a waterproof article of footwear for boots and shoes (14,16), comprising an upper having an outer layer of waterproof and breathable material (Gore-Tex layer 40) and an inner layer (inner bootie 16) formed of moisture wicking (fleece like brushed polyester 30) and insulating material (insulating material 32), and a waterproof seal (the sole pad and the upper are continuous and therefore are

a waterproof seal) connecting said sole pad to said upper. The footwear of Covatch is inherently capable of collapsing. It would have been obvious to provide the footwear of Misevich with an upper having an outer and inner layer and a waterproof seal, as taught by Covatch, to provide footwear that is waterproof to keep the foot dry.

Conclusion

3. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111, including:

-“The reply must present arguments pointing out the *specific* distinctions believed to render the claims, including any newly presented claims, patentable over any applied references.”

--“A general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section.”

-Moreover, “The prompt development of a clear issue requires that the replies of the applicant meet the objections to and rejections of the claims. Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06” MPEP 714.02. The “disclosure” includes the claims, the specification and the drawings.

4. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
